REPORT

Report on Inter-disciplinary Talk and its Uses in Education

An inter-disciplinary talk on “AI and its Uses in Education” was organized in Room 2 for the students of the 4th Semester. The session aimed to educate students to the growing significance of Artificial Intelligence (AI) in the field of education and its transformative impact on modern learning systems.

The resource persons for the session were Dr. Mousmita Devi Borkoch, Assistant Professor, Department of Computer Science, and Mr. Gautam Kumar Das, Assistant Professor, Department of Computer Science. Both speakers shared their expertise and provided valuable insights into the applications of AI in education, including its role in personalized learning, automation, and the enhancement of teaching methodologies.

The session proved to be highly informative and engaging. Students actively participated and gained a deeper understanding of the contemporary relevance of AI and its impact on the future of education. The talk successfully broadened the students' perspective on the role of technology in education.
